

Meet iCHANNEL SUITE

You have finally met your perfect match...
... versatile, simple, affordable - iChannel Suite.

Software transcription made easy

Versatile - Access a Voice Solutions server across a VPN or the internet
Quick - Stream dictation while viewing a list of current work on the server
Secure - Passwords and access restrictions provide the security you need

Reliable - Quickly connect to a Voice Solutions server on your LAN
Detailed - View over 10 different fields of data specific for each dictation
Customize - Print custom reports

Simple - Access dictations from any shared directory on your network
Powerful - Play files from digital portables, audio CDs, VS Recorder, and more
Easy - Be up and running within minutes

iChannel Suite is a software transcription solution and includes three separate applications: iNet, iChannel, and iChannel Lite. They all share a similar, user-friendly interface but are each designed to fit different circumstances. So as your company's size and needs change, you can easily switch to the application in iChannel Suite that best fits your current needs. No additional training needed. No additional cost. Simply iChannel Suite.

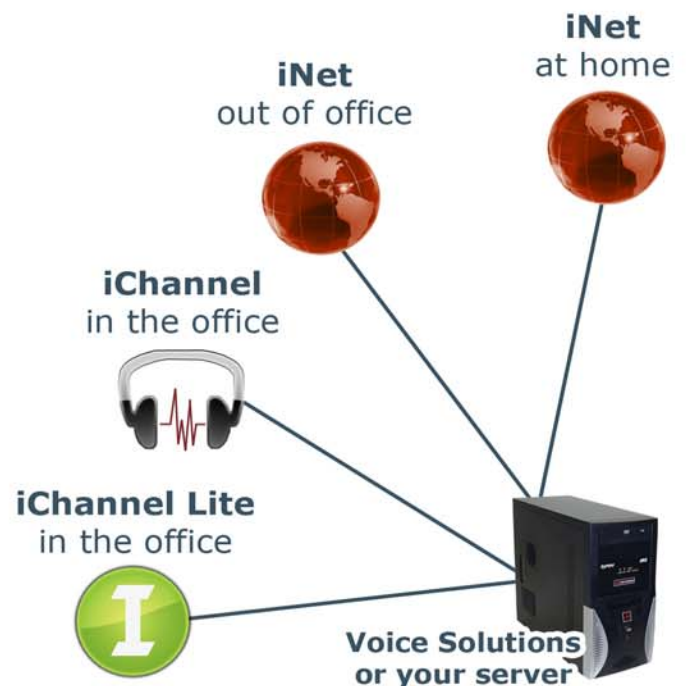

What do you get?

How iCHANNEL SUITE works

Use our Voice Solutions server with iChannel and iNet

or use your own computer to store dictations with iChannel Lite

Type across a LAN, VPN, or the internet

View available dictation. The dictation list may be filtered using various search criteria, allowing you to find what you want quickly. Each job has several columns of data, such as: author, priority status, length, time it was dictated, subject or patient number, and many more. The dictation list may also be printed for your convenience. All the features and data you need are just a click away.

iChannel Suite has a simple and stream-lined interface to keep it a **user-friendly experience**. All of your transcription commands and functions are readily available, as is the basic job data. Try a demo today and see why so many enjoy iChannel Suite!

There are 5 modes, or methods, in which to sort and retrieve dictation: Exclusive, Category, FIFO (First In First Out), Saved, and Specific. This allows you to **set up very specific criteria** as to which kind of jobs you want. In addition, you can also preview and retrieve any dictation by clicking on it in the list, as the image below shows.
